Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 40

acrolein, DNA adducts, miscoding, ^{32}P post-labelling, apyrimidinic sites, 103
activation, oncongenes, differentiation, kinases, 1
aflatoxin B_1, butylated hydroxyanisole, liver, lung, DNA binding, glutathione *S*-transferase, 49
aging, lung metastasis, rhabdomyosarcoma, 77
antineoplastic drugs, *Salmonella*/microsome assay, sweat, human monitoring, 199
apyrimidinic sites, acrolein, DNA adducts, miscoding, ^{32}P post-labelling, 103
ascorbic acid, citric acid, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, tumor induction, urinary bladder, *N*-ethyl-N-(4-hydroxybutyl)nitrosamine, 265
azo dyes, carcinogen, microsomal cytochrome *P*-450, benzenediazonium ion, 319
azo dyes, carcinogenicity, carcinogen DNA, 327

benign prostatic hypertrophy, enzyme-linked immunosorbent assay, factor VIII-related antigen, prostate cancer, von Willebrand disease factor-related antigen, von Willebrand factor antigen, 283
benzenediazonium ion, carcinogen, azo dyes, microsomal cytochrome *P*-450, 319
benzo[*a*]pyrene, hamster tracheal explants, keratinization, retinoids, 235
benzo[*a*]pyrene, skin tumors, garlic oil, inhibition, 193
blood, cisplatin, selenium, glutathione peroxidase, testis tumor, 83
breast cancer, estrogen receptor, isoelectric focusing, 299
breast cancer, tamoxifen, MCF-7 cells, estradiol, estrone sulfate, 115
breast cancer, thallium, scintigraphy, diagnosis early detection, cancer, 161
N-butyl-*N*-(4-hydroxybutyl)nitrosamine, ascorbic acid, citric acid, tumor induction, urinary bladder, *N*-ethyl-*N*-(4-hydroxybutyl)nitrosamine, 265
butylated hydroxyanisole, aflatoxin B_1, liver, lung, DNA binding, glutathione *S*-transferase, 49

cancer, breast cancer, thallium, scintigraphy, diagnosis early detection, 161
carcinogen, azo dyes, microsomal cytochrome *P*-450, benzenediazonium ion, 319
carcinogenesis, mammary tumor, diet, dimethylbenz[*a*]anthracene, 133
carcinogenicity, azo dyes, carcinogen DNA, 327
carcinogen DNA, azo dyes, carcinogenicity, 327
CD-1 mice, retinoids, inhibitory effects, 12-*O*-tetradecanoylphorbol-13-acetate, Sencar mice, 7
cell growth, L1210 cells, glutathione depletion, hydroxyurea, 257
circulating immune complexes, oral cancer, oral submucous fibrosis, oral leukoplakia, immunoglobulins, 185
cisplatin, nifedipine, verapamil, Lewis lung carcinoma, drug resistance, 39
cisplatin, selenium, glutathione peroxidase, testis tumor, blood, 83
citric acid, ascorbic acid, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, tumor induction, urinary bladder, *N*-ethyl-*N*-(4-hydroxybutyl)nitrosamine, 265
collagen, metabolism, 7,12-dimethylbenz[*a*]anthracene, mammary, serum-free, 123
colon cancer, transforming growth factor-α, differentiation, 59
colon carcinoma, mitocyin C, resistance, nucleolar protein, 143
colon carcinoma cell line, transforming growth factor-β, dimethylformamide, retinoic acid, fibronectin production, 219

diagnosis breast cancer, thallium, scintigraphy, early detection, cancer, 161
diet, mammary tumor, carcinogenesis, 7,12-dimethylbenz[*a*]anthracene, 133
differentiation, oncongenes, activation, kinases, 1
differentiation, transforming growth factor-α, colon cancer, 59
7,12-dimethylbenz[*a*]anthracene, mammary tumor, carcinogenesis, diet, 133

7,12-dimethylbenz[*a*]anthracene, metabolism, mammary, serum-free, collagen, 123
7,12-dimethylbenz[*a*]anthracene, skin painting, DNA adducts, 291
dimethylformamide, transforming growth factor-β, retinoic acid, colon carcinoma cell line, fibronectin production, 219
DNA adducts, acrolein, miscoding, ^{32}P postlabelling, apyrimidinic sites, 103
DNA adducts, 7,12-dimethylbenz[*a*]anthracene, skin painting, 291
DNA binding, aflatoxin B_1, butylated hydroxyanisole, liver, lung, glutathione *S*-transferase, 49
DNA strand break, in situ nick translation method, HeLa cell, hyperthermia, 33
drug resistance, cisplatin, nifedipine, verapamil, Lewis lung carcinoma, 39

early detection, breast cancer, thallium, scintigraphy, diagnosis cancer, 161
enzyme-linked immunosorbent assay, benign prostatic hypertrophy, factor VIII-related antigen, prostate cancer, von Willebrand disease factor-related antigen, von Willebrand factor antigen, 283
epigenetic, triazene, liver, promotion, intercellular communication, 13
Epstein Barr virus, 12-*O*-tetradecanoylphorbol-13-acetate, teleocidin B, saponin, Raji cells, 309
esophagus, nitrosamines, single strand breaks (DNA), liver, 203
estradiol, breast cancer, tamoxifen, MCF-7 cells, estrone sulfate, 115
17β-estradiol, estrogen antagonists, radiation, transformation, 177
estrogen antagonists, 17β-estradiol, radiation, transformation, 177
estrogen receptor, breast cancer, isoelectric focusing, 299
estrone sulfate, breast cancer, tamoxifen, MCF-7 cells, estradiol, 115
N-ethyl-*N*-(4-hydroxybutyl)nitrosamine, ascorbic acid, citric acid, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, tumor induction, urinary bladder, 265

factor VIII-related antigen, benign prostatic hypertrophy, enzyme-linked immunosorbent assay, prostate cancer, von Willebrand disease factor-related antigen, von Willebrand factor antigen, 283
fibronectin production, transforming growth factor-β, dimethylformamide, retinoic acid, colon carcinoma cell line, 219

garlic oil, benzo[*a*]pyrene, skin tumors, inhibition, 193
gastrointestional distribution, glutathione, GSH *S*-transferase, GSSG-reductase, GSH-peroxidase, inducibility, 71
GSH-peroxidase, glutathione, GSH *S*-transferase, GSSG-reductase, gastrointestinal distribution, inducibility, 71
glucocorticoid hormones, radiation, 12-*O* tetradecanoylphorbol-13-acetate, transformation, 169
glutathione, GSH *S*-transferase, GSSG-reductase, GSH-peroxidase, gastrointestinal distribution, inducibility, 71
glutathione depletion, L1210 cells, cell growth, hydroxyurea, 257
glutathione peroxidase, cisplatin, selenium, testis tumor, blood, 83
glutathione *S*-transferase, aflatoxin B_1, butylated hydroxyanisole, liver, lung, DNA binding, 49
GSH *S*-transferase, glutathione, GSSG-reductase, GSH-peroxidase, gastrointestinal distribution, inducibility, 71
GSSG-reductase, glutathione, GSH *S*-transferase, GSH-peroxidase, gastrointestinal distribution, inducibility, 71

hamster tracheal explants, keratinization, retinoids, benzo[*a*]pyrene, 235
HeLa cell, in situ nick translation method, DNA strand break, hyperthermia, 33
hepatocarcinogenesis, rat liver, *N*-hydroxy-2-acetylaminofluorene, 247
human monitoring, *Salmonella*/microsome assay, sweat, antineoplastic drugs, 199
N-hydroxy-2-acetylaminofluorene, rat liver, hepatocarcinogenesis, 247
N-bis-(2-hydroxypropyl) nitrosamine, 4,4'-methylenbis(*N*,*N*-dimethyl)benzenamine, thyroid tumor, promotion, rat, 275
hydroxyurea, L1210 cells, glutathione depletion, cell growth, 257
hyperthermia, in situ nick translation method, DNA strand break, HeLa cell, 33

immunoglobulins, oral cancer, oral submucous fibrosis, oral leukoplakia, circulating immune complexes, 185

inducibility, glutathione, GSH *S*-transferase, GSSG-reductase, GSH-peroxidase, gastrointestional distribution, 71
inhibition, benzo[*a*]pyrene, skin tumors, garlic oil, 193
inhibitory effects, retinoids, 12-*O*-tetradecanoylphorbol-13-acetate, CD-1 mice, Sencar mice, 7
intercellular communication, triazene, liver, promotion, epigenetic, 13
in situ nick translation method, DNA strand break, HeLa cell, hyperthermia, 33
isoelectric focusing, estrogen receptor, breast cancer, 299

keratinization, hamster tracheal explants, retinoids, benzo[*a*]pyrene, 235
kinases, oncogenes, differentiation, activation, 1

L1210 cells, glutathione depletion, cell growth, hydroxyurea, 257
Lewis lung carcinoma, cisplatin, nifedipine, verapamil, drug resistance, 39
liver, aflatoxin B_1, butylated hydroxyanisole, lung, DNA binding, glutathione *S*-transferase, 49
liver, nitrosamines, single strand breaks (DNA), esophagus, 203
liver, triazene, promotion, epigenetic, intercellular communication, 13
lung, aflatoxin B_1, butylated hydroxyanisole, liver, DNA binding, glutathione *S*-transferase, 49
lung metastasis, aging, rhabdomyosarcoma, 77

magnetic resonance imaging, metalloporphyrins, tumor-localization, 23
mammary, metabolism, 7,12-dimethylbenz[*a*]anthracene, serum-free, collagen, 123
mammary tumor, carcinogenesis, diet, 7,12-dimethylbenz[*a*]anthracene, 133
MCF-7 cells, breast cancer, tamoxifen, estradiol, estrone sulfate, 115
metabolism, 7,12-dimethylbenz[*a*]anthracene, mammary, serum-free, collagen, 123
metalloporphyrins, tumor-localization, magnetic resonance imaging, 23
4,4'-methylenbis(*N*,*N*-dimethyl)benzenamine, *N*-bis(2-hydroxypropyl) nitrosamine, thyroid tumor, promotion, rat, 275
microsomal cytochrome *P*-450, carcinogen, azo dyes, benzenediazonium ion, 319
miscoding, acrolein, DNA adducts, ^{32}P post-labelling, apyrimidinic sites, 103
mitocyin C, resistance, nucleolar protein, colon carcinoma, 143

nifedipine, cisplatin, verapamil, Lewis lung carcinoma, drug resistance, 39
nitroprusside, nitrosamine formation, 213
nitrosamines, single strand breaks (DNA), liver, esophagus, 203
nitrosamine formation, nitroprusside, 213
nucleolar protein, mitocyin C, resistance, colon carcinoma, 143

oncomodulin, mRNA abundance, placenta, solid tumors, 151
oncongenes, differentiation, activation, kinases, 1
oral cancer, oral submucous fibrosis, oral leukoplakia, circulating immune complexes, immunoglobulins, 185
oral leukoplakia, oral cancer, oral submucous fibrosis, circulating immune complexes, immunoglobulins, 185
oral leukoplakias, tobacco/betal nut chewers, vitamin A administration, 93
oral submucous fibrosis, oral cancer, oral leukoplakia, circulating immune complexes, immunoglobulins, 185

placenta, oncomodulin, mRNA abundance, solid tumors, 151
^{32}P post-labelling, acrolein, DNA adducts, miscoding, apyrimidinic sites, 103
promotion, 4,4'-methylenbis(*N*,*N*-dimethyl)-benzenamine, *N*-bis(2-hydroxypropyl) nitrosamine, thyroid tumor, rat, 275
promotion, triazene, liver, epigenetic, intercellular communication, 13
prostate cancer, benign prostatic hypertrophy, enzyme-linked immunosorbent assay, factor VIII-related antigen, von Willebrand disease factor-related antigen, von Willebrand factor antigen, 283

radiation, estrogen antagonists, 17β-estradiol, transformation, 177
radiation, glucocorticoid hormones, 12-*O*-tetradecanoylphorbol-13-acetate, transformation, 169

Raji cells, 12-*O*-tetradecanoylphorbol-13-acetate, teleocidin B, saponin, Epstein Barr virus, 309
rat, 4,4′-methylenbis(*N*,*N*-dimethyl)benzenamine, *N*-bis(2-hydroxypropyl)nitrosamine, thyroid tumor, promotion, 275
rat liver, *N*-hydroxy-2-acetylaminofluorene, hepatocarcinogenesis, 247
resistance, mitocyin C, nucleolar protein, colon carcinoma, 143
retinoic acid, transforming growth factor-β, dimethylformamide, colon carcinoma cell line, fibronectin production, 219
retinoids, hamster tracheal explants, keratinization, benzo[*a*]pyrene, 235
retinoids, inhibitory effects, 12-*O*-tetradecanoylphorbol-13-acetate, CD-1 mice, Sencar mice, 7
rhabdomyosarcoma, aging, lung metastasis, 77
mRNA abundance, oncomodulin, placenta, solid tumors, 151

Salmonella/microsome assay, sweat, antineoplastic drugs, human monitoring, 199
saponin, 12-*O*-tetradecanoylphorbol-13-acetate, teleocidin B, Epstein Barr virus, Raji cells, 309
scintigraphy, breast cancer, thallium, diagnosis early detection, cancer, 161
selenium, cisplatin, glutathione peroxidase, testis tumor, blood, 83
Sencar mice, retinoids, inhibitory effects, 12-*O*-tetradecanoylphorbol-13-acetate, CD-1 mice, 7
serum-free, metabolism, 7,12-dimethylbenz[*a*]anthracene, mammary, collagen, 123
single strand breaks (DNA), nitrosamines, liver, esophagus, 203
skin painting, 7,12-dimethylbenz[*a*]anthracene, DNA adducts, 291
skin tumors, benzo[*a*]pyrene, garlic oil, inhibition, 193
solid tumors, oncomodulin, mRNA abundance, placenta, 151
sweat, *Salmonella*/microsome assay, antineoplastic drugs, human monitoring, 199

tamoxifen, breast cancer, MCF-7 cells, estradiol, estrone sulfate, 115
teleocidin B, 12-*O*-tetradecanoylphorbol-13-acetate, saponin, Epstein Barr virus, Raji cells, 309
testis tumor, cisplatin, selenium, glutathione peroxidase, blood, 83
12-*O*-tetradecanoylphorbol-13-acetate, glucocorticoid hormones, radiation, transformation, 169
12-*O*-tetradecanoylphorbol-13-acetate, retinoids, inhibitory effects, CD-1 mice, Sencar mice, 7
12-*O*-tetradecanoylphorbol-13-acetate, teleocidin B, saponin, Epstein Barr virus, Raji cells, 309
thallium, breast cancer, scintigraphy, diagnosis early detection, cancer, 161
thyroid tumor, 4,4′methylenbis(*N*,*N*-dimethyl)benzenamine, *N*-bis(2-hydroxypropyl) nitrosamine, promotion, rat, 275
tobacco/betal nut chewers, oral leukoplakias, vitamin A administration, 93
transformation, estrogen antagonists, 17β-estradiol, radiation, 177
transformation, glucocorticoid hormones, radiation, 12-*O*-tetradecanoylphorbol-13-acetate, 169
transforming growth factor-α, colon cancer, differentiation, 59
transforming growth factor-β, dimethylformamide, retinoic acid, colon carcinoma cell line, fibronectin production, 219
triazene, liver, promotion, epigenetic, intercellular communication, 13
tumor-localization, metalloporphyrins, magnetic resonance imaging, 23
tumor induction, ascorbic acid, citric acid, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, urinary bladder, *N*-ethyl-*N*-(4-hydroxybutyl)-nitrosamine, 265

urinary bladder, ascorbic acid, citric acid, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, tumor induction, *N*-ethyl-*N*-(4-hydroxybutyl)nitrosamine, 265

verapamil, cisplatin, nifedipine, Lewis lung carcinoma, drug resistance, 39
vitamin A administration, oral leukoplakias, tobacco/betal nut chewers, 93
von Willebrand disease factor-related antigen, benign prostatic hypertrophy, enzyme-linked immunosorbent assay, factor VIII-related antigen, prostate cancer, von Willebrand factor antigen, 283
von Willebrand factor antigen, benign prostatic hypertrophy, enzyme-linked immunosorbent assay, factor VIII-related antigen, prostate cancer, von Willebrand disease factor-related antigen, 283
